

## Contemporary Light Kit™

**The Contemporary Light Kit has been designed to compliment Hunter's Industrie II, Tribeca, and Avalon ceiling fans.**

**The solid glass diffuser provides an even flow of light, and the Contemporary is energy efficient having been designed for use with 1 x E27 energy saving compact fluorescent or halogen globe (*not included*).**

**24301:** Brushed Chrome with Solid Frost glass

**24304:** Graphite with Solid Frost glass

**24307:** White with Solid Frost glass

# Contemporary Light Kit™

The Contemporary light kit replaces the bottom plate of Avalon, Industrie II or Tribeca ceiling fan, and has been designed to compliment the industrially influenced body.

When fitted, this light kit will add 115mm to the overall height dimensions of the ceiling fan.

The Hunter Contemporary Light Kit can be connected easily to a Hunter ceiling fan, as the light has a plug connector which simply clips into the connector on the ceiling fan. This enables the light to be a DIY installation, if the fan is already installed.
