Led power hub

Unique hand dyed orchid flowers in your choice of colours.

The LED power hub is inspired by tree roots that communicate underground via a fine web of tiny roots called Mycelium.

The hub consists of 2 inner cores each carrying the positive and negative 12V charge.

2 stainless steel wires carry the current to the globe which is poised just behind the orchid flower, the globes are arrayed around the hub at different points

Dimensions

500mm Ø x 560mm high

Materials

Polycarbonate, stainless steel, rubber, Hydro stone, felt

Light specifications

6 x 2W G4 globes generating a warm white light
