

# Xploff

## Pendant

Elliptical discs in three different kinds of poly carbonate; opal, frost and clear, are dyed in myriad hues ranging through the spectrum, making up a library of colours to choose from.

The LED power hub is inspired by tree roots that communicate underground via a fine web of tiny roots called Mycelium. The hub consists of 2 inner cores each carrying the positive and negative 12V charge. 2 stainless steel wires carry the current to the globe which is poised just behind the orchid flower, the globes are arrayed around the hub at different points  
The light is suspended by a single stainless steel wire and balanced so as to rotate freely.

### Dimensions

600mm Ø x 500mm high

### Materials

Polycarbonate, stainless steel, rubber, copper

### Light specifications

10 x 2W G4 globes generating a warm white light

Standard length of drop is 1.5 metres long, if longer length is required, please contact us.
