

## 3X5-F-Y Series

### VBLFT-325-F-Y

Featuring a high quality aluminium body, and an energy saving of up to 60% - the LED Yellow Tube Lamps make great direct replacements for T8 fluorescent lamps as well as also being a deterrent to insects.

### Features & Benefits

- Yellow LED tubes are mainly used to deter flying insects such as moths as they don't see light in the yellow spectrum - so are therefore not attracted to the light source. Yellow tubes are a very popular colour choice when it comes to installing new fittings or replacing old fluorescent tubes (or fittings) in any outdoor situation where flying insects are a problem such as public BBQ areas, signage or under eaves etc.
- Insects and bugs are also attracted to the heat produced by any light such as a fluorescent tube or an incandescent globe and because yellow LED tubes produce very little heat they, are an even more effective insect deterrent than their "old school" fluorescent tube cousins.

## Specifications

SKU	VBLFT-325-F-Y
Luminaire efficacy	70 lm/W
EAN	9340994016801
Light Colour	Yellow
Wattage	10 W
Lumen output	700 lm
IP rating	20
Beam Angle	120 Degrees
Base Type	G13
Diameter	29 mm
Length	588 mm
Lifespan	50000 Hours
Warranty	5 Years
Dimmable	Non-Dimmable
Shatterproof	Shatterproof
LED source	Epistar
Material	Aluminium Body with Yellow PC Cover
Accessories	Also available in Green
Lamp Type	LED
Diffuser	Frosted
Weatherproof	Non-weatherproof
Working temperature	-20°C~45°C
Box Qty	25
